## Testimonial ONP Management GmbH

Bad Vilbel, 10.04.2017

To whom it may concern,

ONP Management has supported the development of the 350 MW German Offshore Wind Project Arcadis Ost 1 in the German Baltic Sea with independent technical and commercial advice.

KNK Wind mandated ONP Management as Owners Engineer for the technical project development in April 2016. Since its engagement ONP has performed the following services:

- Analysis of the ground conditions
- Energy yield assessment incl. turbulence assessment and selection of wind turbine
- Development of a new park layout, to optimize between investment cost and generated revenues
- Assessment of various foundation designs and development of new foundation concept
- Development of an electrical concept design for the offshore substation and inner array cables
- Preparation of project schedule and set-up of project structure
- Coordination of tender process and negotiations of key components (OSS, IAG, foundation, T&I-logistics and WTG)
- Development of an O&M concept

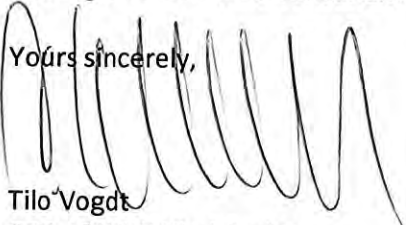

In addition ONP Management successfully initiated and conducted negotiations with investors and prepared the business case for participation in the 1. German Auction for offshore wind projects. As such KNK has been able to secure an investment partner who in turn provided the necessary funds for placing the bid in the auction for grid access in Germany based on ONP-management work and expertise.

BIC: DRESDEFF120

KNK Wind has greatly profited from the impressive network, competent interaction and the experienced team of expert advisors at ONP who have with great skill and commitment accompanied the projects participation in the auction.

This is a major milestone for Arcadis Ost 1 and based on this experience KNK Wind is looking forward to continue working with ONP and have no hesitations to recommend ONP Management as one of the leading offshore wind consultancies in Germany.

Yours sincerely,

Tilo Vogdt  
CEO of KNK Wind GmbH

*The OWF Arcadis Ost 1 project is located within the twelve-mile-zone approx. 19 km off the coast of the island Rügen. Since September 2014 the project is holding a valid building permit. Grid connection is provided by 50Hertz (Transmission System Operator) latest from 2022 subject to a successful auction by the BNetzA (German Energy Regulator). Arcadis Ost 1 has an area size of 30 sq km and the water depth at the site is between 41 m and 46 m.*

*KNK Wind is a project company founded to develop and construct the offshore wind farm Arcadis Ost 1 in the German Baltic Sea 19 km northeast of Cape Arkona/Rügen Mecklenburg-Vorpommern. Shareholders of KNK Wind GmbH are the regional utilities WV Energie AG, Stadtwerke Bad Vilbel and the wind turbine manufacturer Nordex Offshore GmbH.*
